Career Objective

Motivated Java Backend Developer with 2.5 years of hands-on experience through academic, internship, and personal projects. Strong in Core Java, Spring Boot, RESTful APIs, and database management. Seeking an entry-level Java Backend Developer role where I can contribute to building scalable, secure backend systems while continuously enhancing my technical expertise in real-world production environments.

Professional Summary

Recent B.Sc. Computer Science graduate with strong practical experience in Java backend development. Proficient in building RESTful web applications using Spring Boot, Hibernate, JDBC, and Servlets. Experienced in API development, MySQL database design, and application testing using Postman and JUnit. Familiar with microservices concepts, version control, and Agile practices. Known for clean code, problem-solving ability, and continuous learning mindset.

Education

Bachelor of Science(B.Sc) in Computer Science ,
Savitribai Phule Pune University – 2025

Work Experience

Intern, Qasis Infobyte
June 2025 – August 2025

- Developed and enhanced RESTful APIs using **Spring Boot**, following layered architecture (Controller, Service, Repository).
- Integrated **Hibernate ORM** for efficient database interaction and reduced manual SQL queries.Used Spring Boot, Hibernate, Git, and Postman for daily development tasks.
- Performed API testing and validation using **Postman**, ensuring accurate request-response handling.
- Used **Git & GitHub** for version control and collaborative development.
- Collaborated with senior developers in **code reviews**, improving code quality and maintainability.

Technical Skills

- Languages: **Java** (Core, OOPs, Collections, Streams, Multithreading).
- Frameworks & Technologies: **Spring Boot, Spring MVC, Spring Security, Hibernate ORM, JDBC, Servlets, Microservices**

- Databases**: MySQL**
- Testing & Tools: **JUnit 5, Postman**
- Build & Deployment Tools: **Maven, Git, GitHub, CI/CD (Basics: Jenkins)**
- Tools & IDEs**: Eclipse, VS Code**
- Caching & Messaging**: Redis (Basics), Kafka (Basics)**
- AI & ML**:familiar with LLM-based workflows.**

Soft Skills

- **Problem-Solving**
- **Communication**
- **Team Collaboration**
- **Time Management**
- **Critical Thinking**
- **Adaptability**

Project

ATM Management System:

Tech Stack: **Java (Spring Boot), MySQL, REST API, Postman**

- Designed and developed a **secure backend system** simulating real-world ATM operations such as login, balance inquiry, deposits, withdrawals, fund transfers, and transaction history.
- Implemented **RESTful APIs** using Spring Boot following best practices and layered architecture.
- Used **Hibernate/JPA** for database interaction, ensuring data consistency and reduced boilerplate code.
- *Implemented **transaction logging and history tracking** for audit and traceability.*
- Applied proper **exception handling and validation** to ensure system reliability.
- Tested APIs using **Postman**, validating edge cases and error scenarios.
- **Performance Impact:** Successfully handled **50+ simulated concurrent transactions** during testing

Personal Information

- Known Languages : Marathi, English, Hindi
